## Summary

From the moment I produced "Hello world" in the console of my first application, I knew I was hooked into the world of software development. But software development has never been "just a job" for me, it's offered an engaging challenge to continually learn and improve my skills in creating high-quality software. What started with a simple "Hello world" has become a full-fledged passion that only gets more exciting as the years go by.

## Work experience

### ECOMMERCE BACK END

<https://bit.ly/304JVIB>

This project contains complete Back End of Ecommerce Application built using Django, REST API's, and Payment Gateway method.

### HACKER\_NEWS\_SCRAPE

<https://bit.ly/2DrWRq0>

A nicer version of Hacker news, It's a great way of staying up to date with Industry and learn about programming news. This project is created using a Tool called Beautiful soup

### PASSWORD\_CHECKER

<https://bit.ly/2WPF8Qf>

It's not any silly password checker, this is legitimately most secure way to check, if you're password ever been hacked. we can give any no.of passwords as a list it will check for you. This program is built using password API of popular website.

### BLOG\_CLONE\_PROJECT

<https://bit.ly/3eUxJVX>

This blog is a multi-user blog, so you can think of it more as a company blog page, rather than a personal blog. This project is built using Django framework

## Skills

### Programming Languages

Python, JavaScript.

### Web Technologies

Django, REST API's, HTML, CSS, Bootstrap.

### Databases

MYSQL, MSSQL, POSTGRE's

## Experience Summary

- Experience in application development with Python, Django and DRF.
- Extensively involved in developing web services API using DRF
